

# **DEPARTMENT OF PHYSICAL MEDICINE AND REHABILITATION**

## **INTRODUCTION:**

The Department of Physical Medicine and Rehabilitation is actively engaged in providing high quality clinical care, education and is dedicated to improving quality of life of persons with physically disabling conditions.

The PMR Specialist doctor is called "Physiatrist" who treats the patient as a whole with the goal to help patients understand their condition and provide the tools and resources to manage a successful healing process with the ultimate aim at improving the functioning of the patient.

The continuity of care offers a variety of treatment methods to reduce or eliminate challenges and address recurrence.

The services offered are related to pediatric neuromusculoskeletal problems and the developmental delays, musculoskeletal problems, brain injury, stroke, spinal cord injury, acute and chronic pain management, amputation, work injuries, orthopedic injuries, sports medicine.

## **FUNCTIONS OF DEPARTMENTS:**

1. To assess and evaluate disability and provide medical and therapeutic management to patients.
2. To extend assessment and rehabilitation services to the periphery through camps.
3. To undertake surveys, investigations and research concerning the cause of occurrence of disabilities, preventive methods and rehabilitative measures.
4. Conducting non CRE programs and counseling of PWDS, parents and siblings.
5. Awareness programs in health professionals and paramedics regarding services provided for persons with disabilities at center.
